

Logging onto the Laptop

When you turn on the computer or lift the lid if it is already on, you will need to enter a username and password

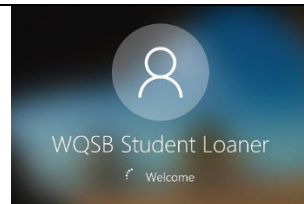

For these special circumstances,

The username is: student
The password is: student

Enter the information in both rectangles and either click on the enter key or click the little arrow to the right of where you entered the password

The computer will read this information and prepare the laptop for the student

The desktop will appear with all the same tools as the students use while at school.

Remember that the computers will be erased and everything reinstalled when the devices come back to the school. Use O365 and save files to your OneDrive.

DO NOT SAVE ANYTHING TO THE DESKTOP AS IT WILL BE ERASED.
